

CONTENTS

Oleksandr Andrejkiv, Rostyslav Lesiv <i>Mathematical model for estimating the period of creep-fatigue crack growth in construction materials at high temperature</i>	7
Jan Awrejcewicz, Yuriy Pyryev <i>On the wear influence on a damper dynamics</i>	11
Pavel Bogdanovich, Denis Tkachuk, Dmitri Bliznets <i>Failure of materials at dynamic contact loading</i>	15
Mykolas Daunys, Romualdas Dundulis, Povilas Krasauskas <i>Temperature and hydrogen concentration influence on zr-2.5nb alloy mechanical and fracture toughness characteristics</i>	19
Mykolas Daunys, Arturas Sabaliauskas <i>Damage accumulation in stress concentration zones of parts with hardened surface under low cycle tension-compression and bending</i>	23
Lukasz Derpeński, Andrzej Seweryn <i>Numerical analysis of fracture for specimens with notches made of elasto-plastic material</i>	27
Krzysztof Doliński, Krzysztof P. Mróz <i>Fatigue cracks growth in the bimaterial - the mathematical model and numerical solution</i>	31
Artur Ganczarski, Marcin Cegielski <i>Effect of continuous damage deactivation</i>	35
Jerzy Kaleta, Przemysław Wiewiórski <i>Detection of defects in magnetic composite rods making use of high resolution scanner</i>	39
Aleksander Karolczuk, Yves Nadot, Andre Dragon <i>Nonlocal method for fatigue limit determination of defective material</i>	45
Roman Kulczycki-Żyhajło, Gabriel Rogowski, Waldemar Kołodziejczyk <i>Two-dimensional problem of non-homogeneous elastic half-space loaded on its boundary surface</i>	51
Andrzej Litewka, Leszek Szojda <i>Experimental and theoretical study of failure of ceramic brick</i>	55
Adam Mazurkiewicz, Tomasz Topoliński <i>Estimation of differences of values structure coefficients for osteoporosis and coxarthrosis samples of trabecular bone from human femoral head</i>	59
Bohdan Monastyrskyy, Andrzej Kaczyński <i>The elasticity problem for a stratified semi-infinite medium containing a penny-shaped crack filled with a gas</i>	63
Zenon Mróz, Grażyna Ziętek <i>Two surface model of plastic hardening for martensitic transformation cyclic deformation</i>	67
Tadeusz Niezgoda, Stanisław Ochelski, Wiesław Barnat <i>The experimental investigation of influence of kind fulfilment basic composite structures on energy the destruction</i>	71
Krzysztof Nowicki, Janusz Sempruch <i>Problems in training process of artificial neural network used to modeling of fatigue curves</i>	77
Volodymyr Panasyuk, Viktor Sylovanyuk, Valerii Marukha <i>Static and cyclic strength of a cracked body which strengthened by injection technologies</i>	85

Dariusz M. Perkowski, Stanisław J. Matysiak <i>On the crack problem normal to the layering in a periodic laminated body</i>	89
Sylwester Samborski, Tomasz Sadowski <i>Damage assessment of porous polycrystalline ceramics on the basis of strain analysis in uniaxial compression</i>	93
Mykhaylo P. Savruk, Andrzej Kazberuk <i>Stress concentration near a rounded v-notch with arbitrary vertex curvature</i>	99
Józef Szala, Dariusz Boroński <i>Of geometrical discontinuities and material inhomogeneities</i>	103
Maciej Szwed, Wojciech Manaj, Grzegorz Wojas, Jan Płowiec, Tomasz Lusa, Krystian Paradowski, Marcin Ciesielski, Andrzej Zagórski, Wojciech L. Spsychalski, Krzysztof J. Kurzydłowski <i>Modern ndt methods for hydrogen degradation assesment</i>	125
Eugeniusz Świtoński, Mariola Jureczko, Arkadiusz Mężyk <i>Optimal design of the composite wind turbine blade</i>	129
Aleksander Yevtushenko, Małgorzata Roźniakowska, Michał Kuciej <i>On one mathematical model of the laser-induced thermal splitting</i>	133
