

CONTENTS

Adam Adamowicz, Andrzej Seweryn <i>Prediction of the brittle fracture using higher order terms of the asymptotic expansion</i>	5
Jerzy Bakunowicz, Henryk Kopecki <i>Stability And Critical States Of Orthotropic Sandwich Structures</i>	11
Marcin Cegielski, Artur Ganczarski <i>Effect of continuous damage deactivation on yield and failure surfaces</i>	15
Barbara Kamińska-Krzowska, Leszek Semotiuk, Marcin Czerw <i>Analysis of possibility of objective sound application to active checking on FV580A vertical machining centre</i>	19
Andrzej Kazberuk <i>Stress concentration around oval hole</i>	25
Tomasz Kopecki <i>Thin-walled structures design problems, considering advanced, post-buckling deformations</i>	31
Adam Mazurkiewicz, Tomasz Topoliński <i>The estimation of changes calculated fem values young's modulus of trabecular bone in function simplifying of modelling of bone</i>	37
Marek Romanowicz, Andrzej Seweryn <i>Fracture of wood under biaxial loading condition</i>	41
Mykhaylo P. Savruk, Andrzej Kazberuk <i>Stress intensity factors for diamond-shaped hole in elastic plane under tension</i>	45
Mykhaylo P. Savruk, Adam Tomczyk, Aleksander Yevtushenko <i>Plane contact problem for semi-space with crack taking into account friction effect</i>	49
Jerzy Śladek, Grzegorz Sokal, Ksenia Ostrowska, Artur Kmita <i>Calibration of coordinate measuring arms</i>	53
Borys Storch, Izabela Wierucka <i>Optical Measurements of Repeatable Contours Using the Image Processing Techniques</i>	59
Heorhij Sulym, Mykoła Mahorkin <i>Asymptotic distribution of stresses, displacements and potential deformation energy in the vicinity of corner point in multiwedge elastic body</i>	63
Jarosław Szusta, Andrzej Seweryn <i>Strain-based damage accumulation model for low cycle fatigue</i>	69
Aleksander Yevtushenko, Michał Kuciej <i>Non-stationary thermal problem in frictional elements</i>	73
Anna Zawada-Tomkiewicz <i>Machined surface image analysis for the estimation of this surface parameters</i>	79
