

## CONTENTS

<b>Jerzy Bajkowski</b> <i>Simulations and tests of absorption and dispersion processes in MR fluid dampers</i> .....	5
<b>Aneta Bohojło, Mirosława Kolodziejczyk</b> <i>Computational analysis of local thermal comfort factors in a habitable room</i> .....	14
<b>Stefan Bućko, Henryk Jodłowski</b> <i>Initiation of plastic strains in steel with physical yield point in conditions of stress gradient</i> .....	24
<b>Jan Burcan, Anna Sławińska, Radosław Bednarek</b> <i>Experimental research on factors that change conditions of aiding by the magnetic field</i> .....	27
<b>Włodzimierz Choromański, Jerzy Kowara</b> <i>Application MBS technique to tests and simulations of rapid transit vehicles</i> .....	30
<b>Jarosław Czaban, Dariusz Szpica</b> <i>The didactic stand to test of spring elements in vehicle suspension</i> .....	33
<b>Leon Demianiuk</b> <i>Test of forces appearing in the matrix of snail briqueting device</i> .....	36
<b>Zdzisław Gosiewski, Mirosław Kondratiuk, Piotr Kłoskowski</b> <i>Current control in the electric circuit of the coil magnetic launcher</i> .....	40
<b>Jerzy Ickiewicz</b> <i>Calculation of the un-finned end caps of the pressure vessels flat</i> .....	45
<b>Marek Jalbrzykowski, Jerzy Nachimowicz</b> <i>The problems of reliability and durability of tools for the injection of plastic materials</i> .....	49
<b>Jarosław Kaczor, Andrzej Raczyński</b> <i>The effect of work surface shape of the rolling bearings on durability of three-support shaft</i> .....	54
<b>Roman Kaczyński, Adam Kłos</b> <i>Analysis of transition processes with boundary lubrication as a protection mechanism against scuffing</i> .....	58
<b>Zbigniew Kamiński</b> <i>Dynamic calculations of pneumatic relay valve</i> .....	62
<b>Ludwik Kania, Szczepan Śpiewak</b> <i>Multiplication factor of double-row ball slewing bearings</i> .....	65
<b>Waldemar Karaszewski</b> <i>Surface cracks of ceramic rolling elements</i> .....	68
<b>Maciej Krasieński, Andrzej Trojnecki</b> <i>Numerical analysis of leak tightness of metal high-pressure „2-delta” gasket</i> .....	71
<b>Stanisław Krawiec</b> <i>Analysis of the influence of pulley diameter and belt section on the values of indexes characterizing v-belt transmissions</i> .....	78
<b>Eugeniusz Mazanek, Marek Krynke</b> <i>Distribution of internal load in the double-row ball bearing slewing rings</i> .....	81
<b>Edward Mundzia, Ryszard Wójcicki</b> <i>The work density of the friction and the wear of journal bearing sleeve material</i> .....	84

<b>Jerzy Nachimowicz, Rafał Piesiecki</b> <i>Applying computer methods to design frames of replicas of cars – dynamic calculations</i> .....	88
<b>Jerzy Nachimowicz, Rafał Piesiecki</b> <i>Applying computer methods to design frames of replicas of cars - static calculations</i> .....	91
<b>Henryk G. Sabiniak, Robert Cichowicz</b> <i>Limitations in application of empirical formulas to design of worm gears</i> .....	95
<b>Tadeusz Smolnicki, Mariusz Stańco</b> <i>Forecasting of the plastic wear in large size rolling bearings with soft raceways</i> .....	98
<b>Dariusz Szpica, Jarosław Czaban</b> <i>The stand to investigations of injectors of fuel from petrol supply</i> .....	101
<b>Michał Śledziński</b> <i>Experimental verification of the design of vibration isolator for soil compacting tool</i> .....	104
<b>Wojciech Tarasiuk, Bazyli Krupicz</b> <i>Analysis of materials of plates forming the lime-sand brick mould</i> .....	107
<b>Piotr Tarasiuk, Krzysztof Molski, Tomasz Koziolkiewicz, Adam Adamowicz, Andrzej Szymaniak, Barbara Funkowska</b> <i>Corrosive and thermal phenomena appearing in full scale testing of wheels of low speed vehicles</i> .....	111
<b>Karolina Walat, Tadeusz Łagoda</b> <i>Application of the covariance extremum on the critical plane for fatigue life determination under random bending and torsion loading</i> .....	118
<b>Ryszard Wójcicki, Edward Murdzia</b> <i>Method of the determination of sleeve wear in radial journal bearing</i> .....	124
<b>Jolanta Zimmerman, Lucjan Śnieżek</b> <i>Numerical analysis of load-carrying capability of conical forced-in joints</i> .....	130
