

CONTENTS

Wiesław Barnat, Tadeusz Niezgoda <i>The experimental investigation of influence of kind geometry of fullfilment basic composite structures on energy the destruction</i>	5
Mariusz Bogdan <i>Simulation and testing of edge detection algorithms for flight among street canyon</i>	9
Stefan Bućko, Henryk Jodłowski <i>The initiation of plastic deformations in beams under pure bending</i>	16
Yevhen Chaplya, Tomasz Karasiewicz, Julian Polański <i>The thermodynamical description of inelastic proceeding of solid solutions</i>	21
Krzysztof Ciecchacki, Tadeusz Szykowny <i>Destruction of different name welded joints in dynamic loading conditions</i>	27
Ryszard Dindorf, Paweł Łaski, Jakub Takosoglu <i>Design and control development of a pneumatic parallel manipulator of tripod type</i>	31
Maksymilian Dudyk, Jerzy Madej <i>The influence of purifying processes on crystallization and quality of aluminum casting</i>	36
Artur Handke, Władysław Twaróg <i>Correlation of the sensory parameters' mathematic models with the kinematic structure of the HAND-K3 hand type manipulator</i>	40
Mirosława Kołodziejczyk <i>Estimation of the discretization uncertainty of an unsteady ventilation problem in a habitable room</i>	47
Mirosław Kondratiuk <i>The simulation research on aerodynamic characteristics of the micro delta wing UAV with mechanical barriers located near edges of attack</i>	54
Mirosław Kondratiuk, Piotr Kłoskowski <i>Preliminary investigations on aerodynamics of micro delta wing with mechanical barriers located near edges of attack</i>	60
Andrzej P. Koszewnik <i>Sliding mode control of the MAV with used eralier calculated aerodynamical forces and moments</i>	70
Cezary Kownacki <i>Control algorithm of micro aerial vehicle flight in streets' canyons based on vision system</i>	76
Cezary Kownacki <i>Stydy on flight control algorithm of micro aerial vehicle in unknown urban enviroment</i>	87
Stanisław Mroziński <i>Influence of the programmed loading on the cyclic properties of 30 HGSA steel</i>	94
Arkadiusz Mystkowski <i>Aerodynamics analysis of Micro Air Vehicle (MAV) delta wing with controlled vortex piezo-generators</i>	100
Walenty Osipiuk, Krzysztof Łukaszewicz <i>The estimation strength of materials hypotheses applicability to the fatigue life prediction of construction elements</i>	107
Mykhaylo P. Savruk, Andrzej Kazberuk <i>On selected fracture mechanics problems for bodies with sharp and rounded V-notches</i>	113
Maciej Ł. Słowik, Daniel Ołdziej <i>Experimental verification of parameters and characteristics of robotic rangefinder</i>	124

Marek Szczotka <i>Dynamic analysis of an offshore pipe installation using the J-lay method</i>	130
Józef Wojnarowski, Jerzy Margielewicz, Wiesław Chladek <i>Modelling studying as the tool of the identification forces of mandibular systems muscles</i>	138
