## CONTENTS

**Krzysztof Augustyn**
*Modelling of Joints on Mechanisms by Means of Spring Elements* .......................................................... 5

**Tomasz Boguszewski, Krzysztof Molski**
*Analysis of Stresses, COD and Energy Released Rate G for Symmetrically Branching Cracks* .................... 11

**Krzysztof Ciechacki, Tadeusz Szykowny**
*Structure and Mechanical Properties of Welded Joints of Ferritic Steel X2CrNi12 with Austenitic Steel X5CrNi 18-10* .......................................................... 17

**Michał Czech, Lesław Kyzioł**
*Influence of the Content of the Polymer for Anisotropy of the Wood Strength for Tensile* .......................... 24

**Zenon Hendzel, Marcin Szuster**
*Neural Dynamic Programming in Behavioural Control of a Wheeled Mobile Robot* .................................. 28

**Andrzej Kazberuk**
*Stress Intensity Factors at Crack Tips Located at Rounded V-Notch Vertex* ............................................. 37

**Ewa Kulesza**
*Analysis of Corrosion Resistance of the Titanium Alloys Obtained by Powder Metallurgy Method* .............. 43

**Tadeusz Łagoda, Karolina Walat**
*Methods of Realization of Service Loadings in the Control Systems of Fatigue Test Stands* ......................... 47

**Krzysztof Łukaszewicz, Walenty Osipiuk**
*The Fatigue Life Prediction of Notched Elements* .......................................................................................... 53

**Romuald Mosdorf, Tomasz Wyszkowski**
*Modelling of Synchronization of Air Bubbles Departing From Two Neighbouring Nozzles* ......................... 59

**Jerzy Nachimowicz, Robert Korbut**
*Energetic Aspects of Needle Bearings Work Performance* .......................................................................... 67

**Grzegorz Puławski**
*Influence of Variable Specific Heats of Working Fluid on Performance of Air Standard Otto, Diesel and Sabathe Cycles* .......................................................... 71

**Maciej Słowik, Daniel Oldziej**
*Cognitive Architectures Survey of Methods and Implementations* ............................................................... 79

**Heorgij Sulym, Wiktor Opanasowycz, Igor Jacyk**
*Bending of Reissner’s Plate Containing Cracks with the Account of Their Faces Contact Zone Width* ........... 85

**Tomasz J. Teleszewski, Sławomir A. Sorko**
*Application of Boundary Element Method for Solution of Two Dimensional Flows* ................................... 94

**Adam Tomczyk**
*The Effect of Crack on Contact Pressure Distribution in a Plane Problem Accounting for Friction* ............... 106

**Adam Tomczyk**
*Experimental Investigations of Fatigue Crack Propagation in Polymethyl Methacrylate Specimen* ............... 114

**Grzegorz Wołkowycki**
*Experimental Determination of Fixed Matrix Regenerator Effectiveness Based on Operation Parameters of Regenerators Working at a Glass Meeting Furnace* ........................................... 121

**Robert Zabielski, Roman Trochimczuk**
*Chosen Problems of Design Procedures of High Speed Milling Electrospindle with Non-Standard Bearings* .... 131
Agata Zajkowska, Łukasz Derpeński, Andrzej Seweryn
Methods of Determination of Real Hardening Curve .................................................. ............................................. 137

Agata Zajkowska, Łukasz Derpeński, Andrzej Seweryn
Methods of Determination of Real Hardening Curve .................................................. ............................................. 143

Krzysztof K. Żur
A New Idea of Modelling and Dynamic Analysis of a Man Walking Apparatus ..................... 148
