

CONTENTS

Marek Błasik, Małgorzata Klimek <i>On Application of the Contraction Principle to Solve the Two-Term Fractional Differential Equations</i>	5
Tomasz Błaszczuk, Ewa Kotela, Matthew R. Hall, Jacek Leszczyński <i>Analysis and Applications of Composed Forms of Caputo Fractional Derivatives</i>	11
Mikołaj Busłowicz <i>Stability of State-Space Models of Linear Continuous-Time Fractional Order Systems</i>	15
Stefan Domek <i>Fuzzy Predictive Control of Fractional-Order Nonlinear Discrete-Time Systems</i>	23
Marcin Graba <i>The Influence of Geometry of the Specimen and Material Properties on the Q-Stress Value Near the Crack Tip for SEN(T) Specimen</i>	27
Piotr Grześ <i>Partition of Heat in 2D Finite Element Model of a Disc Brake</i>	35
Tadeusz Kaczorek <i>Positivity and Reachability of Fractional Electrical Circuits</i>	42
Tadeusz Kaczorek <i>Necessary and Sufficient Stability Conditions of Fractional Positive Continuous-Time Linear Systems</i>	52
Jerzy Klamka <i>Local Controllability of Fractional Discrete-Time Semilinear Systems</i>	55
Zbigniew Kulesza <i>FPGA Based Active Magnetic Bearings Controller</i>	59
Wojciech Mitkowski <i>Approximation of Fractional Diffusion-Wave Equation</i>	65
Dorota Mozyrska, Ewa Pawłuszewicz <i>Linear q-Difference Fractional-Order Control Systems with Finite Memory</i>	69
Zbigniew Oksiuta <i>Microstructural Changes of Ods Ferritic Steel Powders During Mechanical Alloying</i>	74
Piotr Ostalczyk <i>Variable-, Fractional-Orders Closed-Loop Systems Description</i>	79
Piotr Ostalczyk, Dariusz Brzeziński <i>Numerical Evaluation of Fractional Differ-Integral of Some Elementary Functions via Inverse Transformation</i> ...	86
Ivo Petráš, Dagmar Bednářová <i>Control of Fractional-Order Nonlinear Systems: A Review</i>	96
Paweł Piątek, Jerzy Baranowski <i>Investigation of Fixed-Point Computation Influence on Numerical Solutions of Fractional Differential Equations</i>	101
Yuriy Povstenko <i>Solutions to Time-Fractional Diffusion-Wave Equation in Spherical Coordinates</i>	108
Krzysztof Rogowski <i>General Response Formula for Fractional 2D Continuous-Time Linear Systems Described by the Roesser Model</i>	112

Andrzej Ruszewski, Tomasz Nartowicz <i>Stabilization of Inertial Plant with Time Delay Using Fractional Order Controller</i>	117
Łukasz Sajewski <i>Positive Realization of SISO 2D Different Orders Fractional Discrete-Time Linear Systems</i>	122
Dominik Sierociuk, Grzegorz Sarwas, Andrzej Dzieliński <i>Discrete Fractional Order Artificial Neural Network</i>	128
